The plastic copings for CPK abutment are fitted thanks to a snap mechanism on the plastic that is sited on the analog abutment. This allows the abutment to be perfectly positioned and fixed on the analog. The plastic copings for CPK abutment are fitted thanks to a snap mechanism on the plastic that is sited on the analog abutment. This allows the abutment to be perfectly positioned and fixed on the analog.

* The hatch on the top of the plastic transfer indicates the location of the flat area (anti-rotation).

Operating procedure:
In the laboratory

Insert the abutment analog into the plastic cap (in the impression tray).

* Verify that the analog fits properly.

Take the impression.

* Recommended impression material: silicone over 20- shore hardness.

Instrument maintenance.
Sterilization: The device must be sterilized before use by autoclave, at a temperature of 134°C (273°F) during 6 minutes. Do not exceed 134°C during sterilization.

* All parts of the Complete Prosthetic Kits are supplied non-sterile. The plastic components are for single use only.

* The CPK is not intended for use with crowns cast directly onto the abutment analog, such as a CAD/CAM or Captek™ process. When using such a process, work directly off the CPK abutment.

User Manual
Complete Prosthetic Kit (CPK)
The Complete Prosthetic Kit is designed to enable easy impression and transfer technique and to prevent the need to remove and to re-tighten the abutments.

**Advantages at a glance.**
- A selection of lengths, diameters and gingival heights.
- Compatible with crowns or bridges restorations.
- Can be used immediately after implantation.
- Offers improved tissue healing.

**Combination.**
The Complete Prosthetic Kit contains all the necessary components for the dentist to take an impression after implant placement, as well as all the components required for the technician for the fabrication of crowns and bridges.

**Precision.**
The Complete Prosthetic Kit ensures an accurate fit for the impression procedure and the restorative process.

**Kit.**
The Complete Prosthetic Kit enables a simple restorative process by offering four vertical heights of narrow, standard or wide platforms, without any necessary adjustments or additional components.

**Kit contents.**
- Abutment analog
- Crown height for Standard/Wide platform: 4, 6, 8mm
- Crown height for Narrow platform: 4, 6mm
- Burn out plastic cap
- Burn out anti-rotation plastic cap
- Plastic healing cap
- Crown height for Standard/Wide platform: 4, 6, 8mm
- Crown height for Narrow platform: 4, 6mm
- Mount transfer plastic cap
